## **Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

- 1. (Original) Mobile device for a deformable container, comprising:
  - a frame,
  - wheels arranged on the frame for moving the device,
- fastening means arranged on the frame for fastening the top part of the container,
- at least one support member for supporting the container, wherein the device comprises tilting means for tilting the support member relative to the frame.
- 2. (Original) Device as claimed in claim 1, wherein the frame is open on at least one side for passage of the container.
- 3. (Currently Amended) Device as claimed in one or more of the foregoing claims claim 1, wherein the frame comprises engaging means for reasonably engaging the support member.
- 4. (Currently Amended) Device as claimed in one or more of the foregoing claims claim 1, wherein the support member comprises a substantially flat upper side.
- 5. (Currently Amended) Device as claimed in one or more of the claims 1-4 claim 1, comprising a stop for arresting the support member at a predetermined position.
- 6. (Currently Amended) Device as claimed in one or more of the foregoing claims claim 1, wherein the support member comprises a plate having thereunder strengthening ribs in at least one direction.

- 7. (Currently Amended) Device as claimed in one or more of the foregoing claims claim 1, wherein the support member is tiltable about at least one rotation axis relative to a virtual axis.
- 8. (Currently Amended) Device as claimed in one or more of the foregoing claims claim 1, wherein the support member is supported substantially in the centre thereof relative to the frame.
- 9. (Currently Amended) Device as claimed in one or more of the foregoing claims 1-7 claim 1, wherein the support member is supported eccentrically relative to the frame.
- 10. (Currently Amended) Device as claimed in one or more of the foregoing claims claim 1, wherein at least one of the wheels is arranged for swivelling on the frame.
- 11. (Currently Amended) Device as claimed in one or more of the foregoing claims claim 1, comprising a pull or push member on at least one side of the frame.
- 12. (Currently Amended) Device as claimed in one or more of the foregoing claims claim 1, comprising a motor drive for moving the device.
- 13. (Currently Amended) Device as claimed in one or more of the foregoing claims claim 1, comprising a resistance member for braking the support member during tilting thereof.
- 14. (Currently Amended) Device as claimed in one or more of the foregoing claims claim 1, comprising a guide member for moving the support member substantially from front to rear as seen in the travel direction of the mobile device.

- 15. (Currently Amended) Method for offloading a deformable container such as a big-bag from a device as claimed in one or more of the claims 1-12 claim 1, comprising steps for:
  - tilting the support member by means of the engaging means,
- allowing the container to slide off the support member in the direction of the ground surface so that it makes partial contact with the ground surface,
- moving the device away, wherein the container is held in its position by friction between the part making contact with the ground surface.
